

## Monitoring Burlington Ontario

### 1. DATA POINTS

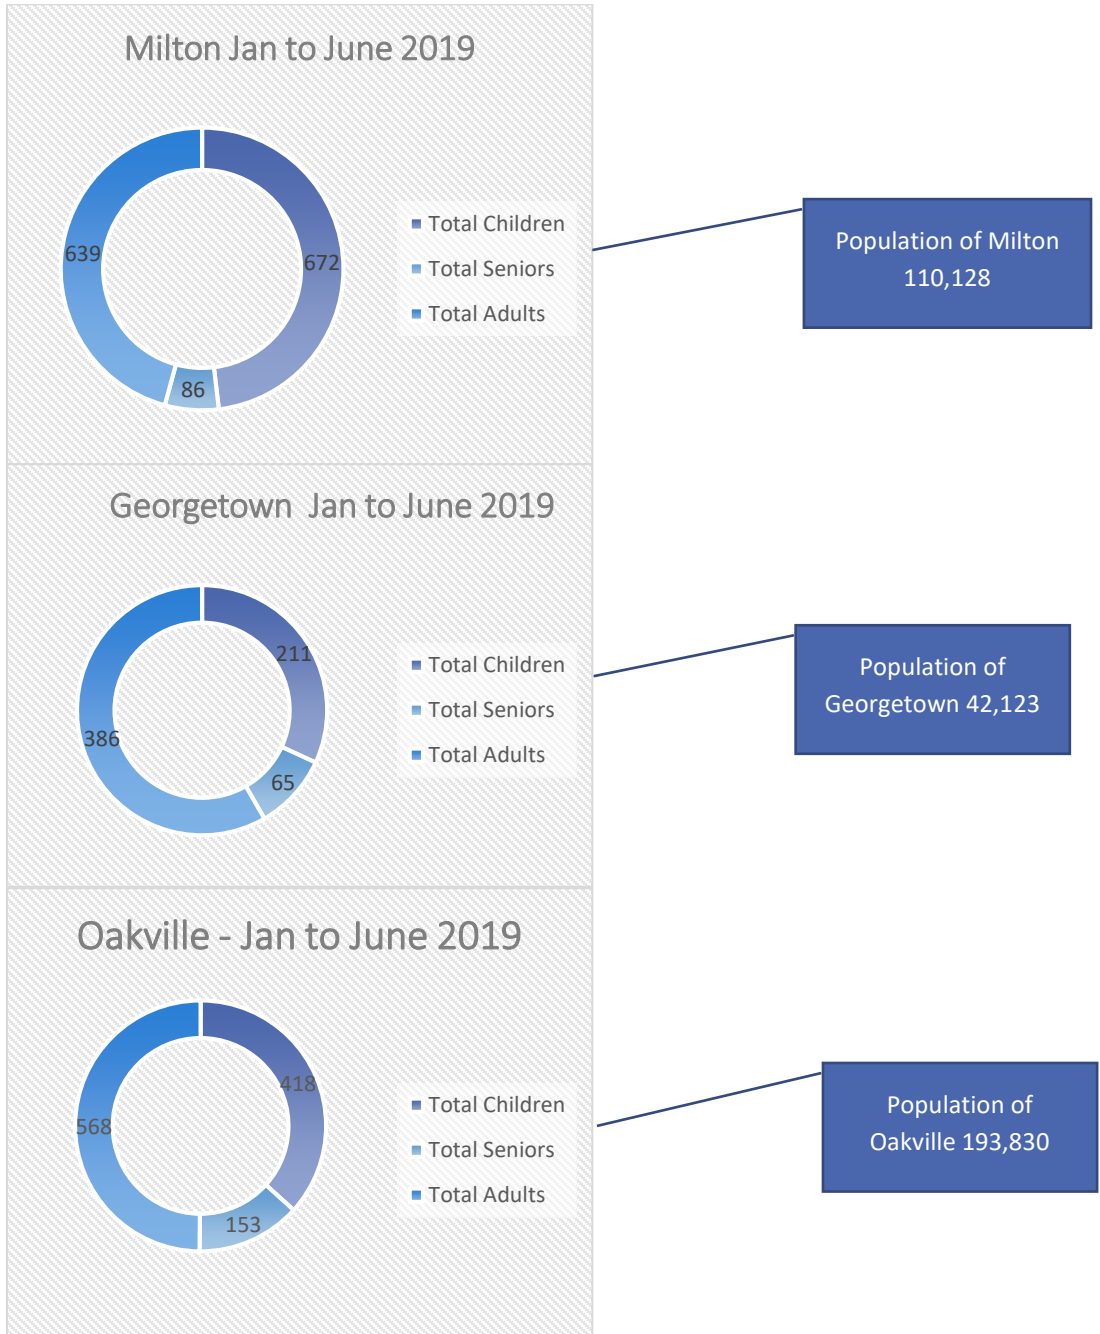

We continue to see a substantial increase in the area of clients served. Below are comparisons for our activities.

We continue to trend with a considerable increase in usage Year-Over-Year, (YOY),. We have now surpassed our 2018 yearly totals in all measurable areas including Households with Children, Unique Households Served and Percentage of Households with Children

	2016	2017	2018	2019 YTD
<i>HOUSEHOLDS W/ CHILDREN</i>	240	257	305	346
<i>UNIQUE HOUSEHOLDS SERVED</i>	584	635	718	794
<i>PERCENTAGE WITH CHILDREN</i>	41.1%	40.4%	42.5%	43.6%

# BURLINGTON HUNGER REPORT – DECEMBER 2019

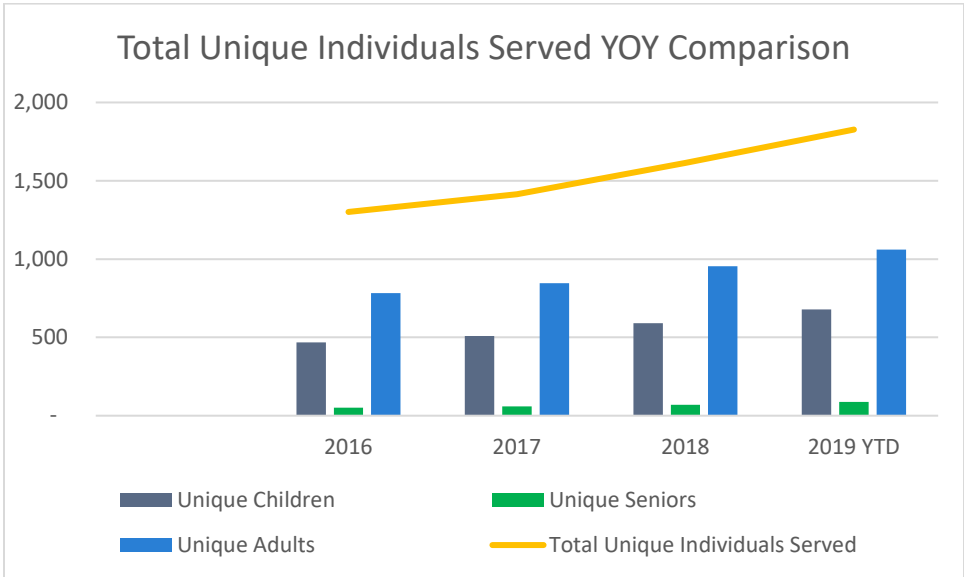

Below is an update of our Halton Region Statistics. We can now see comparisons of Milton, Georgetown and Oakville to our demographics.

# BURLINGTON HUNGER REPORT – DECEMBER 2019

As can be seen in the graph below, though there is some significant increase in the demographic of unique seniors at the Food Bank from 51 to 86 since 2016, there is a more noticeable increase in the demographic of unique children served from 468 to 634 since 2016. I believe in 2020 as part of our objectives; we need to make our assistance for families with children a priority, as children make up 43% of our clients served.

## 2. MATTERS FOR NOTING

- a) Feed Ontario has released their 2019 Hunger Report, we continue trend significantly higher in the percentage of children (43.6%) served in comparison with the provincial percentage (33%). Also noted the increase in the number of employed individuals and families that now need to use Food Banks. Affordable housing continues to be a major issue affecting clients.
